

And the winners are... The Dual PCB Configurable Logic design contest 2015

August 10, 2015 1:32 PM ET

Co-branded as the 2015 Big IDEA, the contest was co-sponsored by Mouser, who supplied their new MultiSIMBLUE on-line circuit configuration tool. This was used in combination with our development board which featured many NXP products:

74AUP2G57GM Dual configurable logic devices

Protection and filtering ICs

Small signal MOSFETs

Small signal diodes

Load switches

The final winners included:

Grand Prize winner Federico Armesto of Argentina with his Class D Audio Amplifier

First Place winner Frank Latos of the USA with his Amateur Radio

Second Place winner Ryszard Milewicz of Poland with his Clear Robo 2

Third Place winner Andreas Fiessler of Germany with his Tesla Coil

Honorable Mention Clemens Valens of France with his Vibrating Bracelet.

These applicants successfully endured three levels of competition where nearly 600 engineers from over two dozen countries battled it out, vying for over \$10,000 in prizes.
