

Join us for a hands-on lab @Embedded TechCon

May 25, 2015 1:59 PM ET

Join us at the Moscone Center in San Francisco, USA for Embedded TechCon.

The event features classes conducted by leading industry experts. They will cover key topics including IoT, automotive, and security, while drawing from the industry's roots with topics like firmware development, debugging, and open-source hardware and software.

We also have our own special hands-on lab at the event, where you can find out about prototyping and debugging an ARM Cortex-M3 based microcontroller using the LPCXpresso1549 development kit.

The first 50 registered attendees will receive an LPCXpresso1549 development kit.

NXP's Hands-on lab

June 10th 3:15-5:30 pm

Room 308

Topic: Getting started with a Cortex-M3 board

Presenters: Steven Guan, Applications Engineer and Joe Hale, Senior Software Engineer, NXP
