

Great success at Cards & Payments Asia

April 27, 2015 2:26 PM ET

At the 20th annual Cards & Payments Asia event, we had the pleasure of meeting up with many industry leaders, partners and visitors. It gave us a great opportunity to share and discuss our NFC-enabled demos on everything connected, everything smart and everything secure.

Here are some of the highlights from the event:

- Mobile Payment Solution

- Enabling multi-application convergence in wearable technology

- Electronic locking devices that offer NFC and wireless communication features

- NTAG I2C demo showing extended passive NFC interaction with electronic devices

- NFC set-top box

- Electronic payment solution for toy vending machine

- MIFARE DESFire EV2

- Golf game using NFC technology

During the show, our speakers engaged with the audience. There were on-floor speaking opportunities and interactive roundtables, providing valuable insights into the latest trends and challenges in this dynamic business environment.

We would like to thank everyone who joined us at the event and we look forward to working with you in the near future.
