

## **Come see NXP at Internet of Things World 2015**

April 27, 2015 2:29 PM ET

### **May 12-13, 2015, Moscone Center, San Francisco**

NXP's Internet of Things (IoT) solutions are designed to drive IoT experiences in smart home, mobility and manufacturing. We focus on the balance between security and convenience, energy and cost savings, and future proof technology.

We will highlight some of our latest innovations in security, processing and connectivity which help create a smarter world.

Please pay us a visit at booth #255.
