

Success at IoT World 2015

May 18, 2015 2:20 PM ET

On May 12-13 at Internet of Things World in San Francisco we highlighted our IoT solutions which help drive IoT experiences in smart home, mobility and manufacturing.

Our focus on balancing security and convenience, energy and cost savings with future proof technology was well received by everyone who visited us at the conference. We showcased some of our latest innovations in security, processing and connectivity which help create a smarter world.

Demos included:

- Smart home networking with ZigBee
- Device commissioning via NFC
- Secure element use in smart locks
- Voice recognition & triggering
- Bluetooth low energy mesh networking.

Thanks to everyone who visited us and we look forward to further conversations!
